

Pham Van Quang - Dotnet Developer Internship

Hoang Mai, Ha Noi • phamvanquang12042002@gmail.com • 0788080887

github.com/pvquang89

Final-year IT student specializing in ASP.NET Core and C#, with a solid foundation in web development technologies. Keen to join a Dotnet internship, applying my skills to real-world challenges and growing alongside industry experts.

WORK EXPERIENCE

Dotnet Internship

Sep 2024 - Dec 2024

Apec Group

Ha Noi

- Applied SOLID principles and design patterns to enhance code quality and maintainability in team projects.
- Learn about Microservices : API Gateway, RabbitMQ, Redis,..
- Collaborated with team members to review and optimize backend solutions, contributing to project efficiency.

SKILLS

Back-end: C#, Net core MVC/API, SQL, NoSQL, Entity Framework

Front-end: HTML, CSS, Javascript, Bootstrap

Database management : MSSQL, PostgreSQL, MongoDB

Other: Design Patterns, SOLID, OOP, JWT, Identity FrameWork

Tools: Git, Github, Jira, Postman

English: Technical reading and basic communication

PROJECTS

JobFinder Website [↗](#)

Nov 2024 - Jan 2025

Design Pattern : Repository Pattern

Features

- Chatbox: Developed an automated chatbox using Google Dialogflow to handle common user queries (e.g., policies, FAQs).
- Real-time Messaging: Built a direct messaging system with SignalR for seamless, real-time communication.
- VNPAY Payment: Integrated VNPAY gateway to enable secure online transactions.
- Authentication & Authorization: Implemented Identity Framework for secure user authentication and authorization.

Technologies used

- Backend: C#, Asp.net core MVC, MSSQL, Entity Framework
- Frontend: HTML, CSS, JS, Bootstrap

Responsibilities

Design database and implement features on the backend

Clinic Website [↗](#)

Apr 2024 - Jul 2024

Design Pattern : Unit of Work

Features

- Authentication & Authorization: Implemented JWT-based authentication and role-based authorization
- Google OAuth: Integrated Google OAuth for login and registration via Google/Gmail accounts.
- Multi-language: Added support for English and Vietnamese to enhance user accessibility.
- PayPal Payment: Enabled secure transactions through PayPal payment gateway integration.

Technologies used

- Backend: C#, Asp.net core API, PostgreSql, Entity Framework
- Frontend: HTML, CSS, JS, Ajax, Bootstrap

Responsibilities

Design database and implement features on the backend

EDUCATION

Software Technology

Aug 2020 - May 2025
